

## Absolute **On-Demand** Mobility Solution

---

An affordable and customizable cloud-based mobility solution with branded booking and driver apps to meet all your needs.

**C**absoluit

# ABOUT US

---

With its intelligent dispatch system and versatile booking management, Cabsoluit aims to make life easy for on-demand services like taxi companies, ride hailing businesses, paratransit and more.

Cabsoluit is developed by Absoluit. We believe there are better ways to maximize your business potential with the right use of precise and innovative IT solutions.

- ✓ Cutting costs through digital automation.
- ✓ Boost the efficiency of your business operation.
- ✓ Adaptability and Customization in a cost-effective way.
- ✓ Expand your business by using intuitive visualizations
- ✓ Great return on investment through seamless operations.
- ✓ Easy maintenance & update through cloud based technology.

# ONE PRODUCT – ENDLESS POSSIBILITIES

---

Cabsoluit is a product that identified gaps between what competitors offer and what customer needs. Cabsoluit comprises not only of the software but also the development team supporting it through providing professional, courteous on-time support and customization.

1

## Taxi Dispatch Software

The intuitive solution takes care of the fleet by using seamless booking, tracking and reporting. Using state of the art algorithms to consider multiple dimensions of connecting the right order to the right vehicle.

2

## Ride Hailing Solution

On demand ready made ride hailing solution with full customizable including brand name, logo, color theme etc in few weeks. You'll get what you want.

3

## SUTI – Mobility Integration

With a hands on experience on working with suti integration, a powerful system that will transport patients to and from hospital safely, comfortably and on time.

4

## MID Approved Taximeter

After the neccasity of having MID approved taximeters in europe, cabsoluit has obtained innovative, affordable and high quality MID approved taximeters that meets all the legal requirements.

## Other Use Cases

## Ticket Management

Support and Improve customer productivity by resolving their issues and problems through ticket management system. Easy Setup. Friendly and Quick.

## Owner Portal

Allow owners to log in and securely view information in the dashboard that's important. List your vehicles and monitor your vehicles and maintain their shifts.

# OUR CLIENTS – TESTIMONIALS

---

We apply our management skills, technological flair and, most of all, our ability to harness our strategic insights when solving our clients' individual challenges. Our team of professionals has consistently helped our clients to achieve their goals that's why our clients always count us and never get disappointed.

We have long-term experience with the Cabsoluit. We recommend Cabsoluit because it supports any size business and it has features like, Vehicle/Driver Monitoring, fare calculation, dispatching and Patient Transport etc. that are essential for Taxi Business

Cabsoluit assisted us in launching our taxi service in Norway with their MID Approved Taximeter. We endorse it, as it is simple to use and we only pay for the vehicles tours that we actively use

Cabsoluit was an amazing buy for us. We recommend Cabsoluit due to its Booking, Dispatching, and reporting features that really attracted us. Due to its flexible pricing, it is the best choice

Nordlys Taxi

Intercab AS

# INTEGRATIONS

---

Secure APIs and Web Hooks can be used with external systems to perform various operations like booking a ride, canceling it and complete details of a ride.

We also have working experience with adapting others protocols e.g. SUTI which is a standard being used in Nordic countries for mobility.

## Booking API

A standard and secure API standard for providing methods for complete life cycle of a booking.
